### Project

Field(s) Theatre, Music, Dance

Description

**Title:** Community theatre, tool for social change

**Target-objectives:**

- a community theatre model theatre building in Europe as a means to recover the collective identity of the communities, as a metaphor for integration in Europe.
- a play making with the help of neighbors through the recovery of verbal memory and history research environments where they live.
- elements integration into the play . Elements that build citizenship identity: music (Portugal) and dance.
- Basque language integration in the play making as a means of building identity and thus encouraging its learning in Europe.
- Target audience: Youth and seniors, future and past of cities, towns, communities, ... Driving elements in the construction and maintenance of popular identities and a European identity, by extension.. The audience will be participants and protagonists of

the construction process of the work, essentially.

Besides, the project aims to popularize access to community theater, so far very selective about its audience, little known in Europe. Transversal dissemination actions will sensitize audience development of this art form

**Project Duration:** 30 months.

**Scheduled actions:**

- Research influence of music, dance and theater in the construction of the citizenship identity by creating a transnational community assembly (transnational meeting). A technological tool for work participation among european partners will be used
- Artistic community meetings in each partner area for the analysis from the neighbors' approach. Each area works its art discipline.
- Methodology Community theater at European level to consolidate this tool as an instrument of social change.
- Community theater play development and results dissemination and best practices transfer as learning approach tool of a minority language, too.
- Digital magazine launching, web platform diffusion.
- .Communitiy theater meeting-
